TESTING CERT #3528 01

**Customer:** PureLuxe  
**Location:** Atlanta, GA 30308  
**Date Received:** 5/14/2019  
**Date Approved:** 5/16/2019

### Project Notes:

Kemin Nutrisurance, Inc.  
Attn: CLS BUILDING #4  
1900 Scott Avenue  
Des Moines, IA 50317

**CONFIDENTIAL**

Sample Number: 19N0055---07  
Sample Description: LONGHAIR CAT  
Sample Type: Petfood Diet  
Customer ID: PLELHC

Method	Description	Result	Units
*KNCLS-WWM-006	Peroxide Value (FOXII)	0.50	mEq/kg Sample
KNCLS-WWM-005	BHA	<1	ppm
KNCLS-WWM-005	BHT	<1	ppm
KNCLS-WWM-005	TBHQ	<5	ppm
KNCLS-WWM-005	EQ	<5	ppm
*KNCLS-WWM-001	Delta:Gamma Ratio	0.86	
*KNCLS-WWM-001	Naturox	475	ppm

Kemin is the Leader in Natural Preservation using Mixed Tocopherols. This is a costly process and many companies cheat the system by purchasing chemically preserved raw ingredients and applying low levels of natural preservation.

#### Pureluxe uses Kemin's brand "Naturox" in 3 ways:

- (1) all raw ingredients such as fresh meat, meals, and fats get stabilized naturally before receiving at the factory.
- (2) all the mill where dry ingredients are combined we add dry Naturox to the mix to further support the shelf-life.
- (3) at the time of production Pureluxe gets liquid Naturox applied to the fat to stabilize the food for 18 - 20 months.

To determine if there is enough preservation for good shelf life simply follow this calculation:

Percentage of Fat x 2 to get parts per million which should be the same or more than the level of NATUROX.

Longhair Cat 16% x 2 = 320ppm and this has 475ppm so it has a strong natural shelf life.

You can see the chemical preservative BHA, BHT, EQ and TBHQ are all LESS THAN the minimum limit of detection, which tells you (the customer) that this food has not been handled with chemical preservation in general.
